

# BUILDING A COMMUNITY FOR THE FUTURE

## Community Updates 2020

© WERQWISE 2020

# WERQWISE COMMUNITY TRANSFORMATION

We've gone beyond expectations to build a community that meets the new standards to the changing world of work.

STATE-OF-THE-ART  
BIOSECURITY  
TECHNOLOGY

Our temperature gate allows us to control access to our community. It prevents anyone with a fever from entering, giving everyone peace of mind.

SELF-CLEANING SURFACES  
IN A TOUCHLESS  
ENVIRONMENT

We've implemented NanoSeptic's light-activated, self-cleaning skins and mats in addition to further updating our touchless environment.

SUPPORTED COMMUNAL  
EXPERIENCE WITH AN  
EYE FOR DETAIL

We've prioritized space and increased public signages, enabling our members to make healthy decisions throughout our shared communal areas.

# SAFEGUARDING OUR COMMUNITY

- Social distance markings in all communal areas and amenities
- Enhanced cleaning schedules and processes with hospital-grade disinfectants
- Nanoseptic, anti-viral, self-cleaning materials on high-touch surfaces (door handles, elevator buttons, touch screens, and ADA grab handles, etc.)
- Biosecurity access control that scans for body temperature in our lobby
- Touchless sanitization stations throughout the building
- Touchless faucets and soap dispensers in the bathrooms
- Pandemic emergency protocols for the Werqwise Member Experience Team
- Dedicated emergency quarantine room

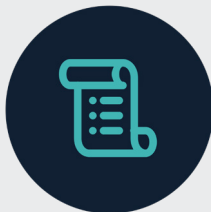

Masks Required In All Communal Areas

Automatic Hand Sanitizer

Sanitized Mail & Deliveries Protocols

Pandemic Visitor Guidelines & Regulations

Health, Hygiene & Cleanliness Signage Throughout The Building

Dedicated Emergency Quarantine Room

# NANOSEPTICS

NanoSeptic skins and mats turn dirty high traffic, public touchpoints into continuously self-cleaning surfaces. Powered by light, NanoSeptic surfaces utilize mineral nano-crystals to create a powerful oxidation reaction. This ground-breaking technology works around the clock to keep our community germ-free.

# TEMPERATURE GATES

This state-of-the-art, biosecurity technology will prevent anyone with a fever from entering the community, giving us all some peace of mind.

# 5TH AND 6TH FLOOR ONE WAY SIGNAGE

We've installed decals with arrows to direct the flow of traffic. To reduce physical contact from one another, please follow the direction of these signs.

# OUR MODIFIED SPACE

## LOUNGE SPACE

- » Social distance markings in all communal areas and amenities
- » Enhanced cleaning schedules and processes with hospital-grade disinfectants
- » Nanoseptic, anti-viral, self-cleaning materials on high-touch surfaces (door handles, elevator buttons, touch screens, ADA grab handles, etc.)
- » Touchless sanitization stations throughout the building
- » Masks required in all communal areas, we have spares available
- » Automatic hand sanitizer dispensers

## KITCHEN

In an effort to safeguard the health of our community, as well as the health of our environment, we have removed all disposal dishes and flatware from the kitchen. We still have all of these items available for you to use upon request. You will also find markings in the kitchen to help you maintain social distance.

## RESTROOM

We have further developed Werqwise's touchless environment by installing automatic faucets and soap dispensers in all bathrooms. You will notice social distance markers on the floor to help you make healthy choices while doing your "business."

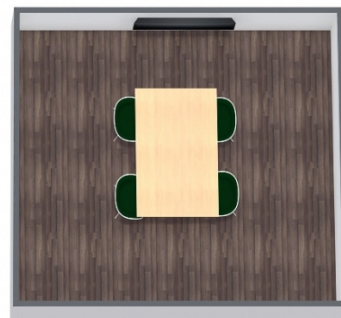

## PHONE BOOTH

Our phone booths are cleaned every two hours to ensure constant sanitization. We ask that you limit your time to two hours and refrain from eating while inside the phone booths. We have placed towels and hand sanitizer near the phone booths so you can sanitize them before use.

# CONFERENCE ROOMS

We have prioritized proper spacing in our conference rooms, removing some of the chairs to decrease overall occupancy. We've also placed diagrams in each room to help our community members practice social distancing protocols.

# ADDITIONAL SPOT+ SPACE

To increase open space for our Spot + members, our “Do Not Disturb Zone” has been converted to Temporary Spot + overflow space.

# SANITIZATION STATIONS

Our sanitization stations enable our members to take cleanliness into their own hands. Wayfinders will help you locate several sanitization stations throughout the space equipped with hospital-strength hand sanitizer as well as disinfectant wipes for cleaning.

# ELEVATORS

We are asking everyone to wear a mask or face covering while using the elevator. There are markers on the ground in the lobby as well as in the elevators to help you maintain proper social distancing.

# PARTNERING UP WITH YOU

We want to be the catalyst that pushes your business to reach its full potential. In addition to safeguarding the health of our community, we want to create symbiotic relationships between members which encourage mutually beneficial partnerships.

# OUR FUTURE COMMUNITY

We've gone beyond expectations to provide a support communal environment that meets the new standards of the changing world of work. We are pleased with the updates we've made thus far, but we're not stopping there. As new information and guidelines become available, we will continue to evolve our community in this ongoing process. We thought hard about your workplace needs, so you can focus on what truly matters, your work.
